

## LITHIUM NR

Here we see all the performance of a real "Donerre" in a product of well proven reliability.

Non-adjustable damper, in which all vital hydraulic values are determined by our specialised engineering office.

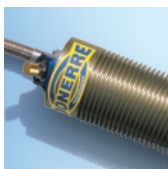

The ideal product for support vehicles or for rally participants with budget-constraints who are looking for a trouble-free damper.

# LITHIUM NR

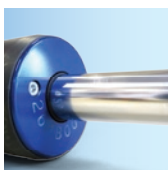

Option : Spring plate adjustable

Option : reservoir with cooling fins mass machined

Steel body Ø70

Rod Ø25 induction hardened and chromed

### Specifications

Price : 1280 euros ex VAT

- Monotube damper with built-in nitrogen tank
- Ø70 steel body to make it unbreakable
- Ø25 hardened chromium-plated steel rod
- Donerre specific anti-leakage system
- Donerre Hydraulic technology
- Hydraulic rebound stop (damper functions as rebound holder)

### Options

Prices for options : contact us

- Thread body with spring plate adjustable to make it a combined spring and damping device
- 2 compression adjustments on a separate reservoir (1 low and 1 high speed)
- One rebound adjustment
